This description is applied to Air Conditioners with WIFI function. Please read the manual carefully before using the product and keep it for future reference.
Please scan the QR code to download the latest App software, or download Smart Life-smart home from APP Store or Google Play. The latest App software includes air conditioner, dehumidifier and Portable air conditioner.

Service condition
Thank you for choosing our air conditioner. This manual applies to air conditioners featuring the WiFi function. Please read the manual carefully before using the product and keep it for future reference. Please do not unplug the WIFI module by yourself. For technical update, there may be deviation of the actual items from the manual. We express our apologies. Please refer to the actual product.

Mention
FCC ID: 2AJCLTWAC-TUWF
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Installing the APP

Download the APP software, and install it on your smart phone or tablet. After installation, locate the “Smart Life” icon.
1. When you open the App for the first time, it will display the activation interface. You can select scan activation QR code (click “Scan” button and scan the activation QR code in below page) or input “Activation Code” words (see below), click “activate” button to active it.

![Scan the activation QR code from instructions or device](image)

Enter Activation Code

3. Air conditioner activation code: **EQK**
Register user account

When using the App for the first time, you need to register an account. Click “Register” button to continue. You can register with your email or Mobile number.

Login to your user account

1. Enter the registered email or phone number account and password, press “Login” button.
2. Using your phone number to login, press “Sign in with SMS” button to enter the next page, enter the phone number and press “get” button to receive the confirm code, via test enter code, then press “Login” button.
3. You also can use the Facebook or Twitter account to login by selecting the appropriate icon.
**Forgot password**

If you forget your password, follow the steps below.
1. Press the “Forgot password” button to enter the next page.
2. Enter the phone number or email account user to register, press “Next” button to enter the next page.
3. You will receive a verification code, enter the code it, and set the new password, press “confirm” button to finish.

---

**Adding your device**

1. Press “Add Device” button to next page, select the product type.
2. There are two methods to add the device match, “CF” or “AP mode”. You can choose by the different button.
Add the device (CF mode)

For CF Mode
1. The system defaults to CF mode at first, Press “Next Step” to continue.
2. Select the home router, and enter the password of router, press “Next” to continue.

3. The APP software will automatically begin searching for your device.
4. After successfully connected, the page will display the prompt as below.
5. You can “Rename” the device, or share with family, press “Done” to control the device.
Add the device (AP mode)

For AP mode
1. Click the “AP Mode” to get to the “AP” screen. Press “Next Step” to continue.
2. Select the home router, enter the password, press “Next” to continue.

3. Select the AC Device named “SmartLife-XXX” at the WLAN setting, then back to the App interface. The App will automatically match your device.
Add the device (AP mode continued)

4. After successfully matched, the page will display the prompt as below.
5. If the match failed, the App will display an error message. Press “Retry” to try again.

Delete the device or Modify device name

Go back to “Device list” page.
Slide the device name toward the left side, you can choose to delete it, or modify the device name.
1. Click the air conditioner name to enter the control interface. Turn ON/OFF. Adjust the temperature.

![Air conditioner control interface](image)

- **Turn ON/OFF.**
- **Display the setting temperature.**
- **Decrease setting temperature.**
- **Increase setting temperature.**

* For App update, the App interface may differ from screenshots in this manual without prior notice.

2. Operating modes: Cool, Heat, Dry, Fan, Auto mode. Click the "Mode" button, and choose desired mode.
   In Dry mode, the App temperature display may be little different from the unit display for the first 3 minutes, caused by the unit temperature quickly changing.
3. Click the “Fan” button, to set the fan speed, Low, Med, High, Auto.

4. Select the "function" button for sleep and Eco modes. When in Sleep mode, the fan speed will be set to low speed.
5. Setting Timer function. Click the “Timer” button, to enter the timer interface.
Press “Add Timer” to set a new timer.
Previous timers will be displayed on timer main screen.
You can edit an existing timer by selecting it from the list.
Air conditioner control

7. More settings. From the 3 dots in the upper right hand corner, there are additional settings, such as Modify Device Name, Device Sharing, Device information, Feedback, Check for firmware update, and Remove Device, Restore Manufacture setting.

6. Click "ON" or "OFF" button to set Timer ON or Timer OFF.
You can set Hour, Minute, operate Mode, Fan Speed, Temperature, and days of the week. After you have entered the info, click "Save" to save your timer, or cancel to exit.
8. You can manage your personal information. Under profile including:
   a, Account information.
   b, Scan QR code: Developers could preview the control interface.
   c, Share Device: Display user's device sharing information.
   d, Message Center: Displays all messages that system sent to users.
   e, Feedback: Where users could submit feedback online.
   f, About: Displays the current App version.

9. Pattern unlock. Tap “Pattern unlock” to set up your App unlock pattern. After it is enabled, you need to draw the pattern to unlock the App.
